

## **An example letterhead PDF.**

This is page 1 of 2. On single page prints only this page will be used.

On multipage PDFs the 2<sup>nd</sup> and subsequent pages will use page 2. This is the effect of a continuation sheet. For example, our office paper has a logo on the front page page but not on the later pages.

## Welcome to the continuation sheet(s)

This part of the template will magically appear on all the subsequent pages. Neat :-)
